AIM OF THE MISSION

The goal of the mission is to create a profile on a professional social network in order to enhance learners' employability and enlarge their working prospects. Learners will showcase their profile and expertise meanwhile they gain new competencies for tracking down companies interesting to them.

This mission will also allow them to transfer their classical social media skills to a professional digital environment.

TIPS AND TRICKS

Don't forget to add the organizations involved in the mobility project in your profile. You can also start following these organisations. This will make your experience more tangible for recruiters and will make your profile accessible to students interested to do the same experience.

DESCRIPTION OF THE ACTIVITY

Through this mission you will showcase your competence and mobility experience you gained during your internship abroad. You will create a professional profile, showcase it and start tracking down the companies you would like to work for.

Look for professional social media (ex. LinkedIn, dribbble for digital web designer etc..) and write here the name of the most interesting one for your professional field and create a basic profile

Analyse at least 3 profiles of students that already went abroad

Complete your profile with all the information about your educational career. Don't forget to include your picture and the mobility experience. Add the Europass certificate

Make a research and start following 10 organisations among enterprises, non-profit organizations and public institutions (employment offices, commerce chambers, etc.)
