AIM OF THE MISSION

Develop awareness of the mobility experience (in terms of competences acquired, new information, knowledge and understanding of another culture) and enhance communication skills through digital tools for informing/mentoring others.

TIPS AND TRICKS

Material should be prepared before leaving your country and enriched during the mobility. The goal has to be clear from the start : you will have to report about your experience and make your peers "live it"

DESCRIPTION OF THE ACTIVITY

Dear student, you are going to create a video...! Yes, yes. Why not? So, you have collected different interviews, you made some videos, you have pictures, you analysed your experience abroad? Now it's time to sum up your experience and share it with the universe. We will give some instructions on how to do it and which aspect you should focus on.

Analyse and select some materials gathered during the experience abroad. You must cover at least one of the following aspects: competences developed, difference in the working culture, working practices between your home and host country, the importance of mobility for personal growth

Based on the material you have, select the social media network most suitable for you (tik tok, instagram, facebook, whatsapp, telegram etc....)

Reorganise, edit your material and create a post and add a description (can be either a text or a video); Hashtag your school once you get the teacher's validation

Once you finished challenge one classmate or internship peer to do the same
